

M. Bagher Abiat

I'm a FullStack(FrontEnd more) JS developer and a nerd boy who loves writing JS & TS. I just learn things, So I'm not afraid of learning new things.

Writing

I like writing articles too, because I love teaching others and share my experiences. Here is my articles:

- [Medium](#)
- [Virgool](#)

Information

- Phone: +989391981195
- Github: [Aslemammad](#)
- Telegram: [Aslemammad](#)
- Instagram (deprecated): [bagher.codes](#)
- Location: Ahvaz, Iran
- Birth: 16/02/2004

Skills

- ReactJS
 - FC Components
 - Hooks
 - Typescript React
 - NextJS
 - AfterJS
 - Jest
 - PWA
 - React-bootstrap | MaterialUI
 - Webpack
 - Rollup
- NodeJS
 - Express
 - Fastify
 - MongoDB
 - Rest
- Deno
- Gnu/linux
- Git
- Algorithms and Data structures

Languages

- Persian
- Arabic
- English

Projects | *Business*

Projects that I worked on.

[Seritaa](#) *Front-end*

- A webapp for taking plans, consultations and ... from doctors.

Projects | *OSS*

Open source Projects that I wrote or contibuted to.

[Jotai](#)

- Ghost Primitive, flexible state management for React
- Passed 2000/Week downloads

[Valtio](#)

- Valtio makes proxy-state simple for React and Vanilla
- Fast & easy

Use-context-selector

- React useContextSelector hook in userland
- A faster React context

Contextism

- React package to Improve your hooks and React context, So have better state management
- Passed 1000/Week downloads
- Type strict

Xmoji

- We don't have strong emoji picker for our OS, So I built Xmoji for Win/linux with React/Electron
- Strong, Fast, Customizable

Bugged.dev

- My own SSG Blog for sharing knowledge.
